.. Not available. PPP is purchasing power parity; an international dollar has the same purchasing power over GNI as a U.S. dollar has in the United States.

Note: Rankings include all 217 World Bank Atlas economies, but only those with confirmed GNI per capita estimates for at least one year during last three year period.

Figures in italics are for 2016 or 2015.

a. 2017 data not available; ranking is approximate. b. Data are for the area controlled by the government of Cyprus. c. Based on regression; other PPP figures are extrapolated from the 2011 International Comparison Program benchmark estimates. d. Based on data officially reported by the National Statistics and Censuses Institute of Argentina. The International Monetary Fund (IMF) has called on Argentina to adopt measures to address the quality of official GDP and consumer price index data, and issued an updated statement on Argentina's progress on August 31, 2016: <http://www.imf.org/en/News/Articles/2016/08/31/PR16389-Statement-by-the-IMF-Executive-Board-on-Argentina>. The World Bank systematically assesses the appropriateness of official exchange rates as conversion factors. For Argentina, an alternative conversion factor has been calculated using a weighted average method for the period from 2012 to 2015. e. Based on data from official statistics of Ukraine and Russian Federation; by relying on these data, the World Bank does not intend to make any judgment on the legal or other status of the territories concerned or to prejudice the final determination of the parties' claims. f. Excludes Abkhazia and South Ossetia. g. Includes Former Spanish Sahara. h. Excludes Transnistria. i. Covers mainland Tanzania only. j. Estimated to be upper middle income (\$3,896 to \$12,055). k. Estimated to be high income (\$12,056 or more). l. Estimated to be low income (\$995 or less). m. Estimated to be lower middle income (\$995 to \$3,895).
